

Advanced Audio Visual Products

Design and Installation of Customized Professional Audio/Visual Systems

Boardrooms

Conference and Training Centers

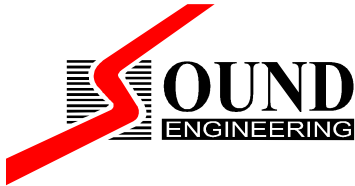

Meeting Rooms

Sound Engineering has over 32 years of expertise in the design and installation of sound systems for virtually every type of setting. Along with helping you select the best equipment for your business or institution, we offer **Computer Enhanced Acoustic System Design** to optimize the sound produced by your system according to the size and shape of the room and even the materials in your walls!

Our external sound and public address systems are used in a variety of locations, including stadiums, warehouses, airport terminals and more.

Dynamic Conference and Meeting Rooms

Outfit your conference and meeting rooms with the latest audio/visual presentation technology expertly designed and installed by **Sound Engineering!**

We offer a wide variety of projectors, gas plasma displays, fixed, manual or motorized roll-up presentation screens - a large compliment of audio/visual conferencing equipment from today's leading manufacturers!

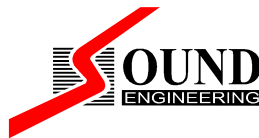

Sound Engineering proudly features **SANYO** and other manufacturers of video projectors offering a wide variety of models to chose from with an extensive selection of features and pricing.

Projector ceiling lifts such as the **DRAPER Scissors Lift** and the desk *Projector Pop-Up* lift by **DISPLAY DEVICES INC.** hide your projectors when not in use to insure a clean presentation of the board room or conference room when video projectors are not needed.

Wireless computer mouse with projector remote controls guarantee the seamless operation of computer presentations from various locations throughout the room.

In conjunction with our superior projection and display devices, **Sound Engineering** installs **CRESTRON** remote control systems to help your organization present high-tech, professional quality multimedia presentations with push-button ease. **Installed remote control systems group the control of all your Audio/Video devices onto an organized and simple to operate touch-screen or button panel.** With a single touch you can power up your projector, dim lights, close drapes, begin a video tape while starting a second VCR player with blank tape installed to record your entire presentation!
